Info

Moris Baroni "Big Trendy-damascus" design knife, suitable for sports use, and at the same time an elegant object. It is characterized by the presence of the "Superdense Twist" damask blade produced by Damasteel, forged with 364 layers

through a complicated forging process, which gives a unique appearance to the steel. It also presents on one side a practice

useful clip for any eventuality. The wood on the handle is cocobolo, a particularly hard wood native to areas of America Central which in addition to ensuring a remarkable resistance, has a rare beauty.
