

Antica Coltelleria Tavella / Torches

Ledlenser - NEO10R

cod. **500917**

Info

The NEO10R, a fundamental player in the NEO series, finds paths with you even where there is none. No matter if through the fields, uphill or downhill, the NEO10R is the ideal companion when it comes to Trail Running. Focusable and with rotating head, it adapts to all circumstances and offers thanks to the Constant Current Mode a constant brightness until the end of the operational duration. The sporty design of the NEO series makes it a true legend on the pitch right from the start.

600 lumen
120 hours
150 meters

Light functions

These settings make the difference:

Power - great light output for every situation
Low Power - energy saving light during long use, reading and working without glare
Mid Power - intermediate light output for every situation

Switch

This is how this Ledlenser turns on:

Front Switch - a switch located on the head of the flashlight for one-handed use

Other functions

The peculiarity of this Ledlenser:

Rear Light - a red rear light so that you can also be seen from behind
Transportation Lock - prevents inadvertent activation of the flashlight

IP protection degree

This Ledlenser features the following protection:

IPX4 - Protects from water splashes
IP5X - Protection against dust deposits

Energy Management System

Absolute control over your battery status thanks to:

Low Battery Warning - warning in case of low charge

Charge Indicator - displays the current battery charge status

Rechargeable.

By using rechargeable batteries, you not only safeguard your wallet, but also the environment. Because ordinary batteries need up to 500 times more current for their production than they offer themselves. If we add to these the energy volume used for transport and storage, an enormous production of Jet-CO2 results

LED

LED configuration

1 x Xtreme LED

Light power 1

MAX 600 lm - MIN 10 lm

Light range 1
