**Info**

The N.E.R.O. has been developed in collaboration with the Italia Design Progetti team.

This project started with a simple idea, to create a tool that is easy to handle and lightweight with high performance.

We have selected only the finest materials. The knife blade is made with N690Co Cobalt Vanadium steel with a vacuum tempering process that reaches a 58-60 HRC hardness. The handles are made of G10 with a coarsely textured grip.

The handles are CNC machined and well contoured to create a smooth surface with a very assured grip.
