

Antica Coltelleria Tavella / Folding
knives

JUPITER

cod. **FX-555 DPB**

Blade Length: 7.8 cm - 3.07"

Overall Length: 19.5 cm - 7.68"

Blade Thickness: 4 mm - 0.16"

Weight: 155 gr - 5.47 oz

Blade: Hakkapella Damascus by Damasteel

Hardness: HRC 59-61

Blade Coating: Etching with hydrochloric acid

Handle: Bead blasted Titanium + Timascus inserts

Clip: sandblasted titanium

Spacer: sandblasted titanium

Screws: Blue anodized titanium

Designer: Denis Simonutti

Made in Italy

Info

The Jupiter folder represents the culmination of the evolution of the locking system already used on the wellknown famous Radius and Saturn, respect to which it gains a new safety lock that allows to inhibit the blade rotation in both open and closed position, so that the folding knife can face even more heavy-duty work than its illustrious predecessors. The design recalls the salient features of the two previous models, managing to integrate even better the round element that host the mechanics.

The blade, devoted to maximum practicality, makes the Jupiter the ideal companion, both in urban and woodland environments: the tip is robust, while the cutting-edge has a gentle and constant curvature, fully usable and easy to re-sharpen.

The handle shines for the ergonomics, characterized by a large recess for the index and a generous space for the other fingers, which will be supported even if you wear gloves; for precision work you can opt for an advanced grip, achieving even more precise cutting-edge control.
